## On-Site Dialysis at Cabrini of Westchester

Exclusively brought to you by Dialyze Direct

## Welcome to Dialyze Direct Built for safer dialysis in the COVID-19 pandemic

Dialyze Direct provides home dialysis treatments in your nursing facility using the most advanced methods and technology. Our treatments are personalized to help patients get the most out of their time at the facility. Research shows that shorter and more frequent dialysis sessions result in significantly improved outcomes:

- reduced recovery time resulting in fewer missed meals and rehab sessions
- reduced blood pressure
- decreased medications
- reduced stress on the heart
- increased fluid removal
- improved anemia management

Our gentler and more comfortable treatment improves quality of life and health outcomes, all while staying within the comfort of your facility.

## Intention. Implemented. Patient care is something we take personally

Receiving dialysis in your facility has never been more important. Under our care, you will receive dialysis without the tiring burden of going to outpatient dialysis centers and the infection risks of traveling outside of your facility.

Our interdisciplinary team provides for every aspect of your dialysis treatment, and coordinates with your skilled nursing/rehabilitation facility to ensure you achieve the best possible health outcomes.

**My dignity in my hands**  
**“I feel better with  
more frequent  
dialysis.”**

## A proven model perfected—so you can live with dialysis, not for it.

At Dialyze Direct, we are committed in one thing: improving your quality of life.

Everything about how we do dialysis is informed by this priority, and is our only measure of success.

Our unique model of in-facility dialysis produces the best results for patients.

You didn't choose to go on dialysis, but you can choose how you get it, and that can make all the difference.

## Your time On your own terms

Traditional in-center dialysis can be time-consuming. With travel, treatments and lengthy recovery times, little time is left for making the most of your rehabilitation stay. Our treatments typically last three hours and recovery times can be as little as 30 minutes.

This allows you to reclaim up to **20 hours a week** of additional time for rehabilitation and activities in the skilled nursing/rehabilitation facility.

## The benefits that make us better make you better

Eliminate time, stress and energy spent traveling to outpatient facilities for dialysis, while **minimizing COVID-19 infection exposure.**

Your treatment is performed by experienced, highly trained professionals using state-of-the-art dialysis technology.

Better control of hypertension and anemia, less fatigue, less medications, fewer dietary restrictions, and less rehospitalizations.
